

Alley Pond

ANIMALS ALIVE

Our PTA has secured a fantastic program, *Animals Alive* for each of our classes! Students will engage with live animals, providing them a great way to enhance their understanding of animal classifications and ecology. For our Pre-K students, their experience will focus on habitat, diet, texture, and movement developing their observational skills and abilities to make connections to their own experiences

For the K-5 students, they will focus on discussing predator/prey relationships and animal adaptations, sparking critical thinking and encouraging them to explore how animals survive in their environments.

Program dates include:

January 13th

January 14th

January 31st

February 6th
